The Badge Lanyard with the Double Pull-A-Way™ Design

THE KEYS TO OUR SUCCESS:

- **Double Release Feature**
- **Non-Absorbent Material**

Think Safety

The Pull-A-Way is designed with two types of polymeric tubing. One that will hold around the back of the neck and the other is of dissimilar material that connects on either side of the neck. Both materials are non-absorbent and with simple hand, dish or anti-bacterial soap weekly, you will prevent the harmful buildup of bacterial fungal growth that is inherent with woven or cloth type lanyards.

Pull-A-Way lanyards are available with three standard clips. (Alligator clip, O-Ring, Badge)

Our *T.R.I.A.D.*™ (technical resistance insertion adjustment device) system allows for adjustment of the “Pull-A-Way” resistance of the lanyard in the event of an entanglement. This allows the user to determine the release properties if they are using a single badge or a host of badges and devices from the lanyard.

MANUFACTURED IN THE USA

STANDARD COLOR IS BLACK

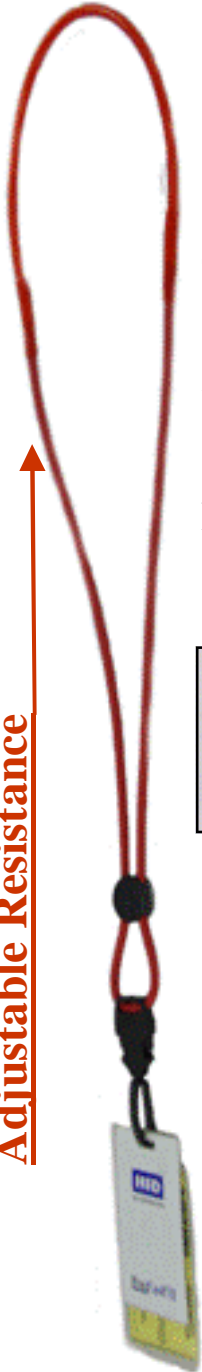

(Red & Blue are available as custom color options)
